## LATEXSample 2

## August 17, 2018

LATEX is a document preparation system for the TEX typesetting program. It offers programmable desktop publishing features and extensive facilities for automating most aspects of typesetting and desktop publishing, including numbering and cross-referencing, tables and figures, page layout, bibliographies, and much more. LATEX was originally written in 1984 by Leslie Lamport and has become the dominant method for using TEX; few people write in plain TEX anymore. The current version is LATEX  $2_{\varepsilon}$ .

$$E_0 = mc^2 (1)$$

$$E_0 = mc^2$$
 (1)  
$$E = \frac{mc^2}{\sqrt{1 - \frac{v^2}{c^2}}}$$
 (2)
